OneSpace Designer Modeling Help

## **Browser icons**

Objects		Status	icons	
	part - name of active part is underlined green		modified - object to right has been modified since last save to database	
*	assembly	a	locked - object to right cannot be modified	
	container	<b>₽</b> T	shared part	
	workplane - name of active workplane is underlined green	shared assembly		
Ф	workplane set	selective instance - object to right has shared contents, but independent instance info		
<b>*</b>	face part	untouchable - due to open references the object to right car be modified		
>	wire frame part (3D curve)	0	open references - references which cannot be resolved because their target object is currently not available	
Ţ×	coordinate system	Feature	es	
0 0	3D view set of an Annotation drawing	ņ	feature (user defined, generic note, Sheet Metal,)	
60	3D view of an Annotation drawing	100 to 10	part group	
<b>a</b>	3D docuplane set	10	fixed or variable 3D annotation group	
<del>"</del>	3D docuplane	孠	GD&T datum	
		₩	GD&T tolerance	
Partiall	y loaded objects	<b>5</b>	design simplification definition	
4	partial assembly	Mold De	esign features	
	partial part		core feature	
	partial container		cavity feature	
	partial workplane		undercut feature	
中	partial workplane set		slider feature	
			silhouette feature	
Model V	/ersioning	20	parting line feature	
M <sub>p</sub>	assembly which is a version of an original	رق ا	plastic feature	
	part which is a version of an original			
	container which is a version of an original	Design Simplification		
	workplane which is a version of an original	**	simplified assembly that contains a simplification definition	
Ð	workplane set which is a version of	***	simplified assembly not owning a	

Browser icons Page 3 of 4

	an original		simplification definition
-	face part which is a version of an original		simplified part that contains a simplification definition
$\wedge$	wire frame part which is a version of an original		simplified part not owning a simplification definition
<b>□</b>			Simplified versions are displayed with the same icons shown here, except in the Model Versioning color.
Lightwe	Lightweight models		nalysis
	Part loaded from Model Manager with the lightweight option selected	<b>Va</b>	a clash analysis - blue indicates the analysis is up-to-date, green indicates it is out-of-date, and red indicates it is invalid
Configu	Configuration		
LT	Configuration		

Annotation Drawing Browser						
	drawing (consisting of one or more sheets) (text colored as views)	•	view to right was updated using Econofast mode			
	sheet (current sheet icon is green) (text colored as views)	<b>(G)</b>	view to right was updated using graphics mode			
$\Box$	frame (drawing border)		detail border			
Ø	view - updated (blue text)	₹ <b>-</b> ₹	section line			
Ø	view - not updated (cyan text)		sketch			
Ø ≣ front1	view - error (red text, no 3D view plane or associativity broken)	II	modified			
⊕ <sub>Elat</sub>	flat view (Sheet Metal)					

Advanced Assembly Module							
(Icons are	(Icons are blue if updated, green if unsolved)						
[ <del>4 →</del> []	position/assembly relation set	a∷	angle variable	11	parallel		
<b>←→</b>	model/feature relation set	?≒	logical variable	ь	perpendicular		
_∆_	angle	X:	number variable	<u> </u>	rack		
a	cam	ď÷	distance variable	0	radius		
Q.	coincidence	!>	check variable		rigid		

Browser icons Page 4 of 4

١			l <u>.</u>	[		
	Ø	diameter		angle measure	( )	symmetry
	1	distance	V	distance measure	6	tangent
	<b>.</b>	fixed		length measure		animation
	<b>%</b>	gear	Q	radius measure	ā	animation sequence

Design Analysis Module					
<b>₽</b>	study				
<u> </u>	material property				
7,5	mechanical boundary condition (loads, constraints, enforced displacement, mate relations)				
٥	thermal boundary condition (heat, temperature, convection coefficient)				
<b>3</b>	mesh				
Ø	result set (color is solid dark cyan if not active)				

Machining Module
